

Care and Support - Adults

Our Homecare, Enablement and Supported Accommodation services deliver different types of care and support dependent on the needs of the individual. We provide support to adults with Learning Disabilities, Physical Disabilities, Mental Health challenges and Autism Spectrum Conditions.

What is a typical day like in adult support?

You may be helping get our clients up and ready for the day, or supporting them with winding down for the night. During the day you may be expected to help the people we support with their personal care, getting dressed, medication and helping to make meals. You could be supporting individuals with their day such as food shopping, social visits and day trips, or attending one of our clubs. At the end of the day you may be expected to help our clients wind down with making dinner, getting ready for bed and evening medication. In some instances, you might be expected to stay the night to ensure our clients are kept safe and well.

Where will I be based?

Depending on your role you could be based in one of our 24/7 support houses or out in the community with multiple clients.

What hours would I be expected to do?

We provide 24/7 care to the adults that use our service. As a member of the team you may be expected to work early mornings, late nights or stay overnight. Shifts may also fall on weekends and public holidays. We ask that you provide us with your availability for work and we will agree with you how many hours per week we have that we can guarantee you as a minimum.

What training or experience will I need?

Full training to complete the Care Certificate will be provided to all successful applicants along with the opportunity to complete a Level 2 or Level 3 qualification in Health and Social Care for those who wish to.
